Industrial Design Reflection Of A Century 19th To 21st Century

Industrial design is a process of design applied to products that are to be manufactured through techniques of mass production. A key characteristic is that design precedes manufacture: the creative act of determining and defining a product's form and features takes place in advance of the physical act of making a product, which consists purely of repeated, often automated, replication. This distinguishes industrial design from craft-based design, where the form of the product is determined by t

Industrial design - Wikipedia

This story is a reflection of my brief encounter with VR during my last design process. I am an industrial designer and by far not an expert on VR. However, I want to share some of the notes I wrote down of how I see VR being a valuable tool in my future projects. I hope this story can give you some new thoughts to take with you into your next ...

VR + Industrial design process. This story is a reflection ...

Technology is a reflection of ourselves as humans, and design holds up that mirror. Your greatest strengths are in transparency and humility—creating possibilities rather than solutions. This is how we design a more open, inclusive world.

This work features challenges of using integrated reflections in undergraduate Industrial Design and Engineering. Reflection activities can be challenging for the students and hard to implement in design and engineering classes. This report has two goals. The first is to introduce a process for more successful engagement for the students in problem solving and design.
