multiranger - Gilson Engineering Sales

HTML5 has provided new attribute multiple for input element whose type attribute is file. So you can select multiple files and IE9 and previous versions does not support this.

How to select multiple files with <input type="file">?

This command sets the following options for file type association: Collection named Virtual Desktop Collection. Remote Desktop application alias of iexplore. File name extension of .html to associate with the application. Virtual desktop named RDS-WKS-A27. Users can see the file name extension.

Set-RDFileTypeAssociation (RemoteDesktop) | Microsoft Docs

The file type is commonly determined by the filename extension. For example, the .docx files may be associated with Microsoft Word. A single file extension might have more than one association for performing different actions. Specifically speaking, an application might be associated with a file extension to open this type of files, but another ...
