Section 20: Problem 1 Solution. Working problems is a crucial part of learning mathematics. No one can learn topology merely by poring over the definitions, theorems, and examples that are worked out in the text. One must work part of it out for oneself. To provide that opportunity is the purpose of the exercises. James R. Munkres.

Section 20. The Metric Topology Note. Thetopological conceptsyou encounterin Analysis1are basedon themetric onRwhich gives thedistancebetweenx andy inRwhich gives thedistancebetween x and y in R as |x− y|. More generally, any space with a metric on it can have a topology defined in terms of the metric (which is ultimately based on an ε definition of pen sets).
